# MTA TURNSTILE ANALYSIS

ZIMU SU

# INTRODUCTION

#### Motivation:

> Improve staff/resource management for MTA at different weather condition and pandemic situations.

## Objectives:

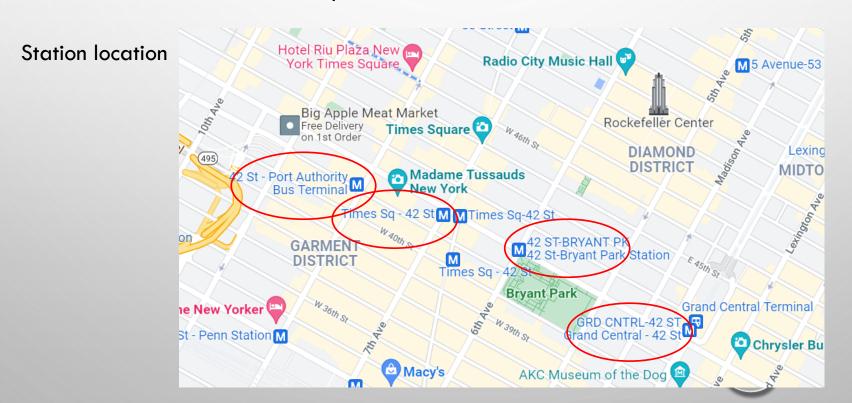

Explore the trend of entry/exit numbers at MTA station in New York city as response to local weather condition and daily COVID new cases.

## **METHODOLOGY**

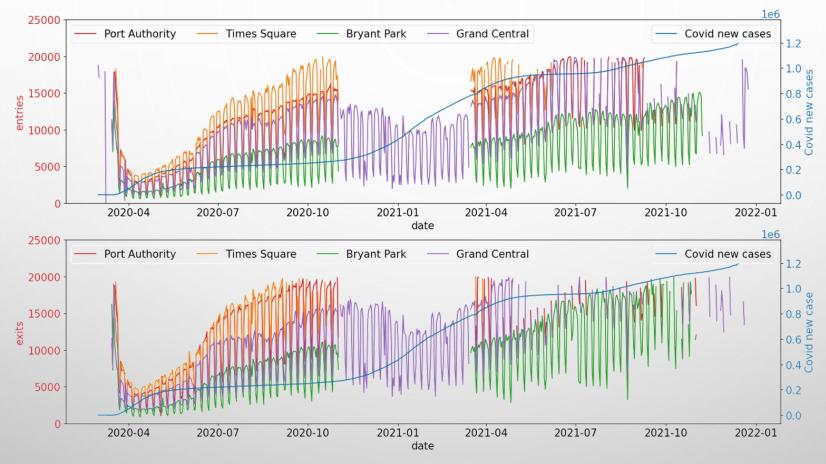

- Data sources:
  - > MTA Turnstile data (entries/exits number): http://web.mta.info/developers/turnstile.html
  - NOAA Climate Data (temperature, precipitation): <a href="https://www.ncdc.noaa.gov/cdo-web/">https://www.ncdc.noaa.gov/cdo-web/</a>
  - New York Times Covid statistics: <a href="https://github.com/nytimes/covid-19-data">https://github.com/nytimes/covid-19-data</a>
- Tool: SQLalchemy, pandas, matplotlib, seaborn

- Data cleaning and manipulations:
  - Conversion to daily data;
  - > Remove abnormal data caused by lost date data in subunit channel;
  - > Reversed counted entries/exits value are removed.
  - Stratified analysis for weekdays/weekends.
- MTA and climate information are collected from the stations in 42 street near Times Square. Covid new cases are collected from the whole New York City.

## **RESULTS**

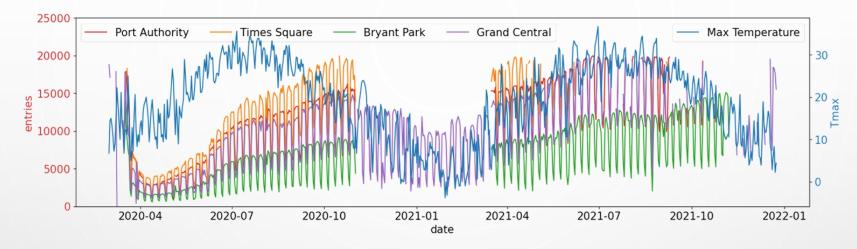

Time trend of entries/exits number and daily covid new cases:

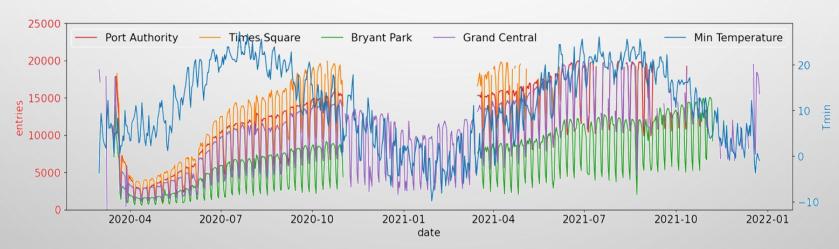

- Trend of entries and exits number are very similar;
- Riders at four station increases before 10/2020 and after 02/2021. Decreases between 10/2020 and 02/2021.
- Covid new cases continue growing in New York city.

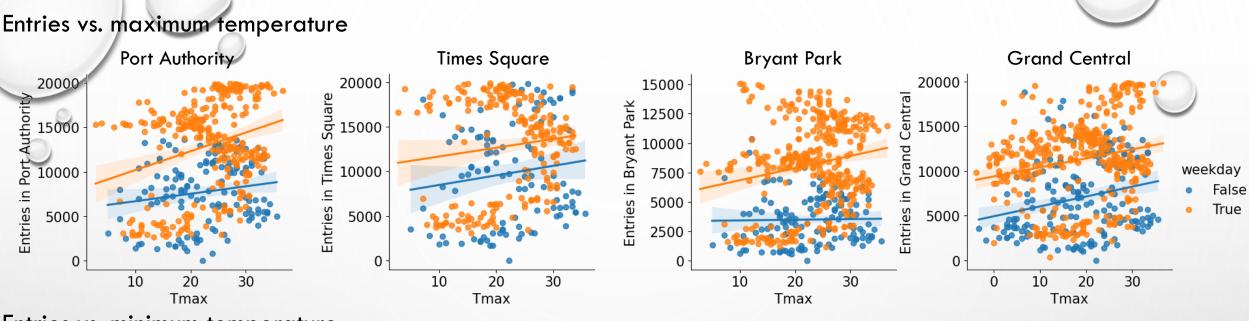

Entries vs. covid new cases at four stations at weekdays and weekends Port Authority Times Square 20000 **Entries in Port Authority Entries in Times Square** 20000 15000 15000 weekday 10000 weekday 10000 False False True True 5000 5000 0 -0.25 0.50 0.75 1.00 0.00 0.25 0.50 0.75 1.00 0.00 1e6 Covid Cases 1e6 Covid Cases **Bryant Park Grand Central** 15000 20000 **Entries in Bryant Park Entries in Grand Central** 12500 15000 10000 weekday 7500 weekday 10000 **False False** 5000 True True 5000 2500 0 0.25 0.50 0.75 1.00 0.5 1.0 0.0 1e6 Covid Cases Covid Cases 1e6 There are positive relationship between entries and covid new cases.

## Time trend of entries and maximum/minimum temperature within the day

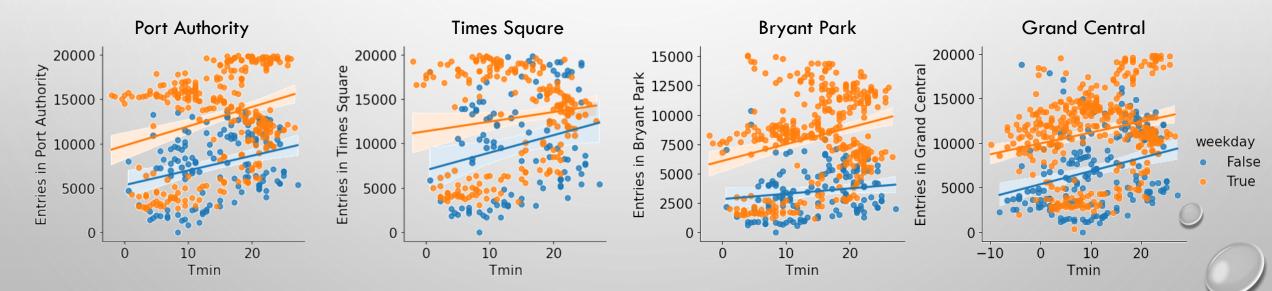

• Consistent trend between entries and temperature after 11/2020.

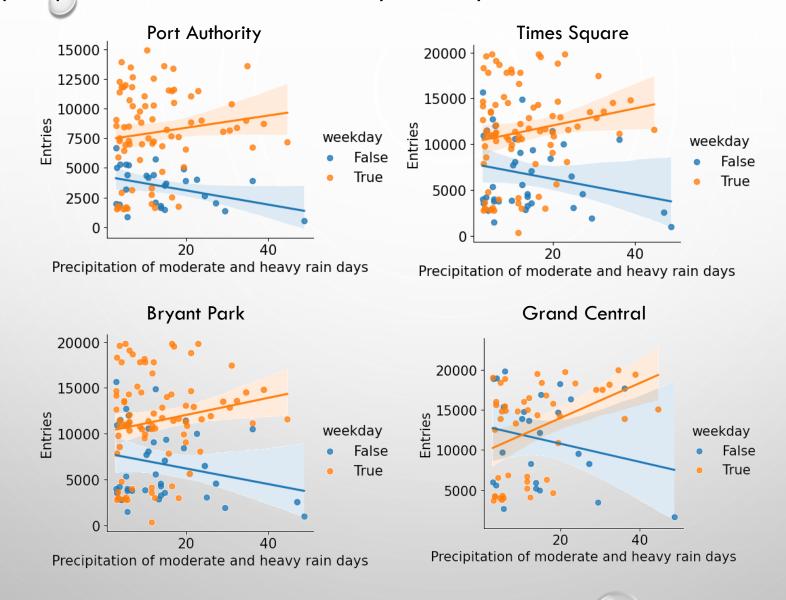

- More likely to take MTA for higher temperature;
- The positive trend is more obvious on weekdays compared to weekends, except times square station.

### Entries vs. precipitation in moderate and heavy rain days

People are more likely to take MTA in heavy rain on weekday, not on weekends.

# PRELIMINARY CONCLUSIONS

- MTA rider number and covid new cases are positively related;
- MTA may distribute more staff resources for warm and hot days;
- More staff can be deployed in heavy rain day at weekday, but less on weekends.
